

This is emphasis **This is bold** *This is in italics* *This is again emphasis* This
 is in tiny text mode. This is in scriptsize text mode. This is the size of the footnote. This is
 small size font. This is the large size font. This is also the Large
 size font but much bigger than before. This is also
 the LARGE size font but much much bigger than
 before. This is the huge size font. This
 is the Huge size font and is much
 bigger.

This text is left left flushed using flushleft.

This is text in the center done using center.

This text is flushed to the right using flushright.

The symbol
 (which you will not be able to see as it is a latex command) can also be used
 to move to the newline and it breaks the line right where it is and can only be
 used in the paragraph mode.

$\cos(x)$

Now we will end this demo and discuss various symbols and problems related
 to them in the next demo.
